DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3-9, 12-14, 16-19, 21-25 and 27-32 are rejected under 35 U.S.C. § 102(e) as being anticipated by Takahashi *et al.* (USPAP 2002/0026160 A1)

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. § 102(e). This rejection under 35 U.S.C. § 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Regarding claims 1 and 4, Takahashi et al. teach a float (5) for a liquid waste disposal apparatus (1) contained in a floatable state inside a container (E) for containing an absorbed liquid waste (21) comprising:

- a solidifying agent retaining portion (5b) for retaining a solidifying agent (6);
- a revolution prevention member (5a) restrained by an inner wall of the container (L1);
- a flow path (¶ 0089) for flowing downward the liquid waste (21) absorbed from an upper portion into the container (E).

Application/Control Number: 09/888,453

Art Unit: 3761

Regarding claim 3, Takahashi *et al.* teach a flow path having an interstitial portion formed between the sidewall of the float body (5a) and the inner wall (L1) of the container (E)(\P 0089).

Regarding claim 5, see Fig. 10).

Regarding claim 6, Takahashi *et al.* teach an absorption stop valve (9a) activated when pushed upwards by an upward-pushing portion (5b).

Regarding claim 7, Takahashi *et al.* teach the solidifying agent (6) open downward with a water permeable (22) sheet at the open portion (Fig. 11).

Regarding claim 8, Takahashi et al. teach a float with a specific gravity of less than 1 (¶ 0129).

Regarding claim 9, Takahashi *et al.* teach that the device is of a color distinguishable between the color of liquid waste (¶ 0092).

Regarding claims 12-14 Takahashi *et al.* teach an absorption stop valve (9a) activated when pushed upwards by an upward-pushing portion (5b).

Regarding claims 16-19, Takahashi teaches the solidifying agent (6) open downward with a water permeable (22) sheet at the open portion (Fig. 11).

Regarding claims 21-25, Takahashi *et al.* teach a float with a specific gravity of less than 1 (¶ 0129).

Regarding claims 27-32, Takahashi *et al.* teach that the device is of a color distinguishable between the color of liquid waste (¶ 0092).

Page 4

Allowable Subject Matter

Claims 2, 10, 11, 15, 20, and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

No art of record teaches a float having revolution prevention member further comprising a guide member.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Bogart whose telephone number is (703) 605-1184. The examiner can normally be reached Monday-Friday.

In the event the examiner is not available, the examiner's supervisor, Weilun Lo may be reached at phone number (703) 308-1957. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9306 for regular communications and (703) 746-3380 for informal communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 306-0858.
